```python
import json

data = {
    "id":101,
    "course": "Machine Learning",
    "status": "Completed"
}
with open("data.json", "w") as f:
    json.dump(data, f)
with open("data.json", "r") as f:
    p = json.load(f)
    print(p)
```
